

Site Waste Management Plans— Are you ready?

Half Day Workshop

Designed to be run at your company for 10-15 delegates, we can deliver:

- Practical exercises on how to fill in SWMP
- An overview for your whole team on the importance of SWMP
- An overview of all the information you need to be legally compliant
- An introduction to industry standard pro formas

We deliver a half day workshop, designed to be practical, easy to understand and leave delegates with the essential information they need and the tools they need to implement SWMP's.

Courses can be held at your place of work or at The Innovation Centre, Loughborough.

For more details and to discuss how we can tailor this course to suit the needs of your company, call us on 0845 056 8336 or email chloe@responsible-solutions.co.uk

This April, Site Waste Management Plans become mandatory in England for the construction industry. To comply with the legislation, all projects over £300,000 in value should have completed a SWMP.

To avoid fixed penalty notices and fines of up to £50,000 we can help you equip your company/workforce to know how to produce and implement site waste management plans.

Even if your project is under £300,000 you could prepare your company for when you will need a SWMP.
